

PHILIP CHO

Data Analyst

Salalah, Oman | (+968) 94840841 | Philcho21@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Self-taught Data Analyst based in Salalah, Oman, with proven expertise in SQL, Python, and data visualization. Completed IBM Data Analyst Professional Certificate and built a portfolio of 5+ end-to-end data analysis projects spanning e-commerce, HR payroll analysis, and job market research. Proficient in turning complex datasets into actionable business insights through rigorous analysis and compelling storytelling. Available for full-time roles, freelance projects, and remote opportunities worldwide.

CORE COMPETENCIES

SQL (PostgreSQL) • Python (Pandas, NumPy, Matplotlib, Seaborn) • Web Scraping • Exploratory Data Analysis (EDA) • Data Visualization (Tableau, Cognos Analytics, Looker Studio, Excel) • Data Cleaning & ETL • Statistical Analysis • Business Intelligence • E-commerce Analytics • REST APIs • Dashboard Development • Data Storytelling

TECHNICAL SKILLS

- Databases & Query Languages: PostgreSQL, SQL (window functions, CTEs, complex joins, query optimization)
- Python: Data analysis with Pandas & NumPy; visualization with Matplotlib & Seaborn; web scraping with BeautifulSoup; REST API data collection
- Data Visualization: Tableau, IBM Cognos Analytics, Looker Studio, Excel dashboards with pivot tables and advanced formulas
- Tools & Platforms: Jupyter Notebook, Google Sheets, Git/GitHub, data wrangling and ETL processes

PORTFOLIO PROJECTS

E-Commerce Sales Performance Analysis

PostgreSQL | SQL | Business Intelligence

- Analysed 100,000+ transactional records in PostgreSQL to uncover actionable business insights for annual strategic planning
- Identified top 20% of products generating 80% of revenue using SQL window functions and CTEs
- Discovered 35% repeat-customer rate, average order value of \$87, and 45% Q4 holiday season sales spike
- Optimized SQL queries reducing runtime by 60%; cleaned and transformed 100K+ raw transaction records

Collecting Jobs Data Using Python

Python | BeautifulSoup | Pandas | Web Scraping

- Built automated web-scraping pipeline collecting 10,000+ job listings using BeautifulSoup and requests
- Cleaned and structured raw data into analysis-ready dataset using Pandas and NumPy

- Identified top 10 most in-demand technical skills; mapped salary distributions by job title and location

NYC Payroll Exploratory Data Analysis

Python | Pandas | Matplotlib | Seaborn | EDA

- Analysed multi-year NYC payroll dataset covering thousands of city employees across agencies
- Identified departments with highest average overtime pay and total compensation spending patterns
- Created professional visualizations using Seaborn and Matplotlib; surfaced cost-saving opportunities

Car Sales Interactive Dashboard — Excel

Excel | Pivot Tables | Advanced Formulas | Dashboard Design

- Cleaned and analysed raw car-sales data (\$2M+ dataset) in Excel
- Built interactive dashboard with pivot tables, slicers, and dynamic charts for key performance visualization

Data Analytics Capstone Project

Python | REST APIs | SQL | Tableau | Full Workflow

- End-to-end analytics project: data collection via REST APIs, cleaning, SQL querying, exploratory analysis, and Tableau visualization
- Completed as part of IBM Data Analyst Professional Certificate programme

EDUCATION & CERTIFICATIONS

IBM Data Analyst Professional Certificate

IBM / Coursera | 2024 | 9-Course Specialisation

- Data Analysis with Python
- SQL for Data Science & Databases
- Data Visualization with Python, Tableau & IBM Cognos Analytics
- Web Scraping & REST API Data Collection
- Capstone: Full end-to-end analytics project

PROJECT & FREELANCE EXPERIENCE

Independent Data Analytics Projects

2024 – Present | Self-directed / CP Analytics Portfolio

- Completed 5+ end-to-end data analysis projects spanning e-commerce, HR payroll, job-market research, and sales analytics
- Delivered Python web-scraping pipeline collecting 10,000+ job listings for market trend analysis
- Built interactive Excel dashboard analysing \$2M+ in car-sales data with pivot tables and dynamic charts
- Wrote and optimised complex SQL queries in PostgreSQL on datasets of 100K+ records
- Maintained active public portfolio with 6+ repositories on GitHub demonstrating technical proficiency

AVAILABILITY & INTERESTS

- Full-time Data Analyst positions
- Freelance data analysis and dashboard development projects
- Business intelligence consulting
- Remote opportunities worldwide with option to relocate for the right role

ADDITIONAL INFORMATION

- Portfolio: CP Analytics — CP Analytics portfolio showcasing all projects with detailed documentation
- GitHub: github.com/Philcho21 — 6+ public repositories with project code and analysis
- Tableau Public: Public Tableau visualizations and interactive dashboards
- LinkedIn: [linkedin.com/in/cho-philip-18792b194](https://www.linkedin.com/in/cho-philip-18792b194)
- Self-taught analyst committed to continuous learning and staying current with data analytics trends
